

Husqvarna TR 36.

Applications.

- For small jobs including house slabs when a polished finish is not necessary.
- Not recommended for use with a pan.

Benefits.

- 36" blades are universal for operator convenience.
- Motor position places the weight in the center line of gravity so it is easier for the operator to control the machine.
- The Speed Pitch, which allows the operator to instantly pitch the blades, is closer to the handle tube than previous models for easier access.
- The handle tube has been lengthened compared to the other models by 6" to create better leverage.
- Lifting bracket for easy lifting on and off the slab.
- Adjustable arms allow operator to easily modify arm if trowel is out of balance.
- Heavy-duty guard ring has a low profile for better balance and durability.
